VecturaBook

vecturabook.com · help.vecturabook.com/en/

VecturaBook is a logbook for truck drivers, made by a working truck driver.

Every shift, trip, load and refuel in one place on your phone — and a clear PDF report when you need to show what you did.

ON THE ROAD

- Start a shift and a trip in a few taps: client, origin, destination, odometer.
- Multi-drop trips: every delivery point with its arrival and finish time.
- Waiting, unloading and loading timers — the time is recorded, not guessed.
- Parking and stops, nights in cabin, border and ferry crossings (switch them on if you need them).

CARGO

- Containers (20, 40, 45 ft, empty or laden), refrigerated loads with temperature, tankers by compartment, flatbeds, car transporters, tippers, lowbeds and oversized loads.
- Read container numbers, seal numbers, odometers and VIN codes with the camera. A container number is accepted only when its check digit is correct.
- Dangerous goods: ADR mark and UN number on the load, in the history and in the PDF.
- Swap or drop the trailer at any point of a trip or between trips.

FUEL

- Diesel, AdBlue and the trailer unit or generator — each in its own field.
- Average consumption in L/100 km, km/L or MPG, for each truck.

HISTORY AND REPORTS

- History by shift and by trip: route, cargo, times and mileage at a glance.
- A PDF report for any period — trips, mileage, working and waiting time, refuels — to send to your dispatcher or keep for yourself.

GARAGE AND DOCUMENTS

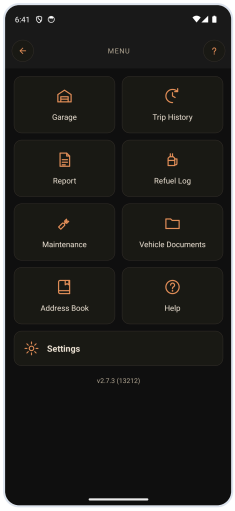

- Trucks and trailers with plates, axles and tyres, maintenance.
- "Document Photo" on every trip: waybills, CMR and any other papers — photographed at loading and unloading and kept with the trip.
- Truck and trailer documents in the garage — vehicle registration, insurance, inspection and your own — with photos of every page and the valid-until date.
- Driver's license and other driver documents in the driver profile, with photos.
- Notifications before a document expires.
- Address book of clients and places.

YOUR DATA STAYS YOURS

- Works offline, no account needed.
- Backup to a file you can save or send, plus a copy of the logbook kept on the phone; restore on a new phone.
- 29 languages, including Hebrew and Arabic read right to left.

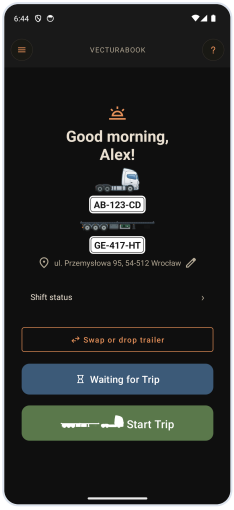

Getting started

VecturaBook is a truck driver's logbook: shifts, trips, refuels, parking stops, documents, and vehicles on one phone. Everything stays on your phone and works offline.

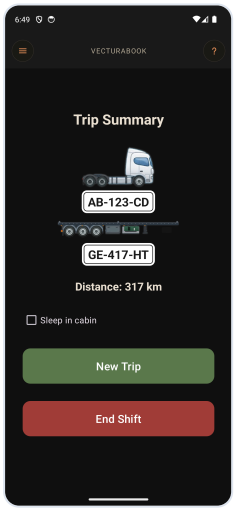

Shift

A shift is your working day from start to finish. Trips, refuels, and parking stops happen inside a shift; shift totals go into your history and reports.

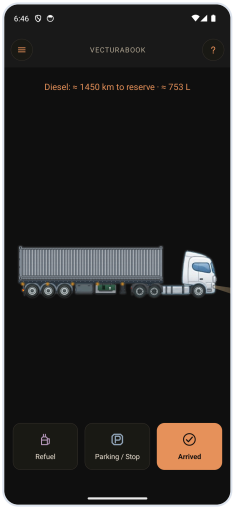

Trip: loading to unloading

A trip is logged step by step: origin and destination, what you are carrying, cargo details, summary — and "Start trip". At the stop: arrival, unloading or loading, summary. Until you tap "Start trip", nothing is written to the logbook: at any step you can go back with the "Back" button without losing what you entered.

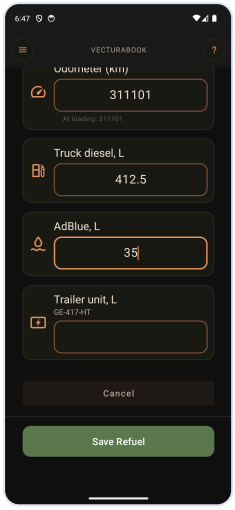

Driving screen

While a trip is underway, the Main Screen shows "In progress": the vehicle on the trip, truck and trailer plate numbers, driving time, and buttons for your next actions.

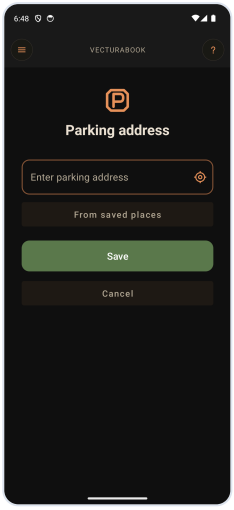

Refuelling, AdBlue, unit

Refuels are used to calculate fuel consumption, build reports, and show the "to reserve" estimate.

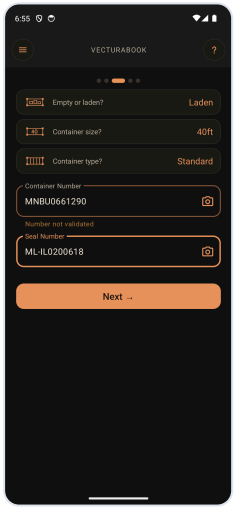

Parking and rest

A parking stop is any break on the road: rest, overnight stay, or waiting. It is logged in the trip with its own address and time.

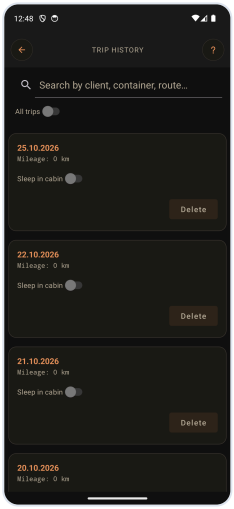

Camera: containers and seals

The camera reads container numbers, seal numbers, VINs, and odometer readings so you do not have to type them by hand.

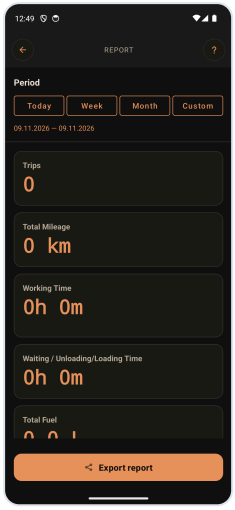

Trip history and editing

History holds all your shifts and trips. Here you can view, search, edit, and delete them.

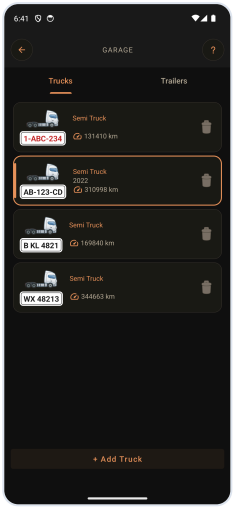

Report and PDF

The report totals your work for a period: trips, mileage, working time, waiting time, fuel, and consumption.

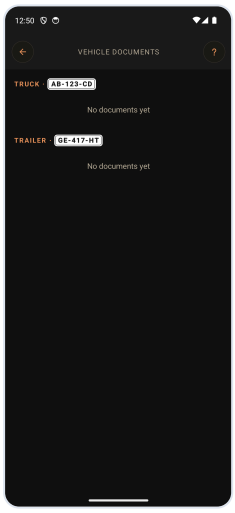

Garage: trucks and trailers

Garage stores your vehicles. It provides the rig drawings, plate numbers, trailer compatibility, mileage, and all vehicle settings.

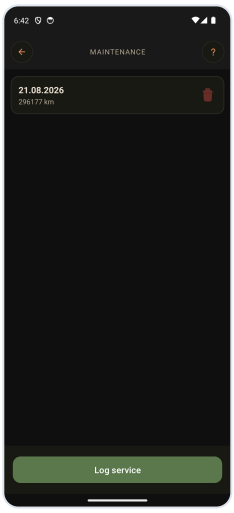

Documents and expiry dates

Vehicle and driver documents with page photos and expiry dates. The app reminds you before they expire.

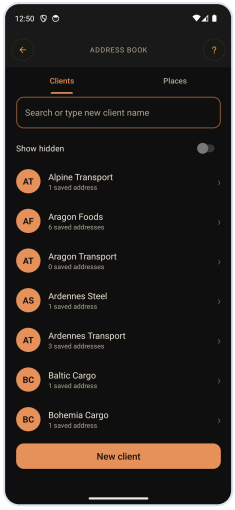

Maintenance and tyres

Maintenance: service records, intervals, and reminders when service is due.

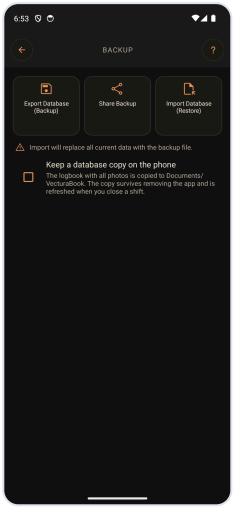

Address book and clients

Clients and their addresses, plus your own places. The book grows automatically whenever you enter a new client in a trip.

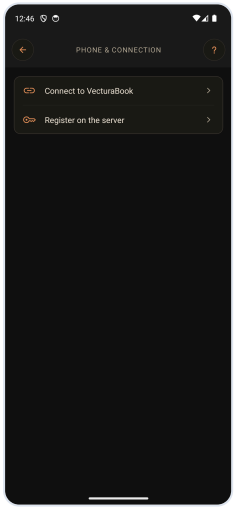

Backup and restore

A backup is a single file containing your entire logbook: trips, shifts, refuels, vehicles, and documents with photos.

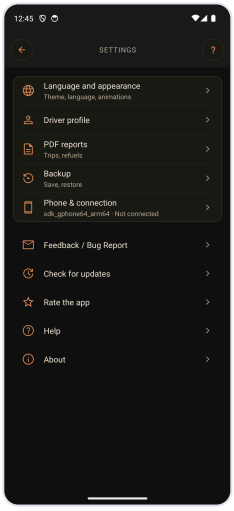

Online app

The online app is my.vecturabook.com: the same logbook in your browser and on your other devices.

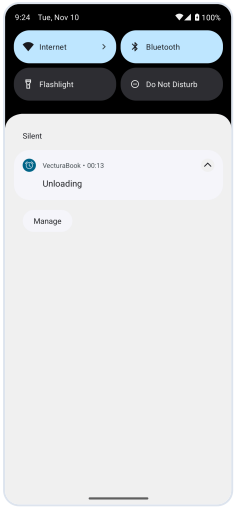

Settings

Settings are organized into groups: “Language and appearance”, “Driver profile”, “PDF reports”, “Backup”, “Phone & connection”.

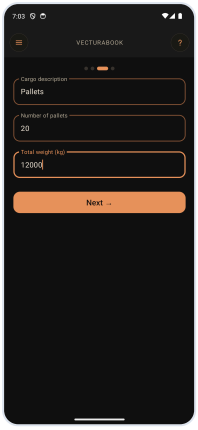

Notifications and reminders

The app lets you know what is running now and what is coming due soon.

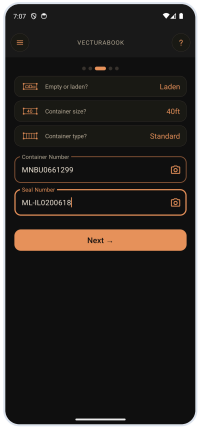

Flatbed

A flatbed carries general and oversized cargo.

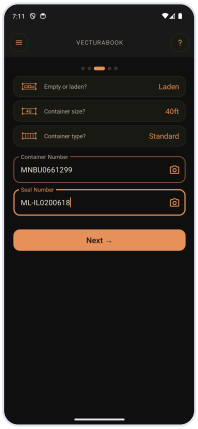

Container

A container chassis carries one or two 20ft, 40ft, or 45ft containers.

Sidelifter

A sidelifter loads and unloads containers by itself.

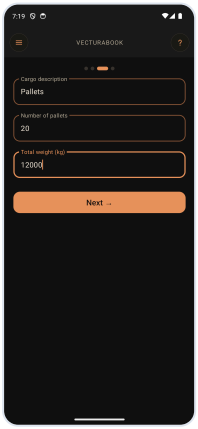

Refrigerated

A refrigerated vehicle carries temperature-controlled cargo.

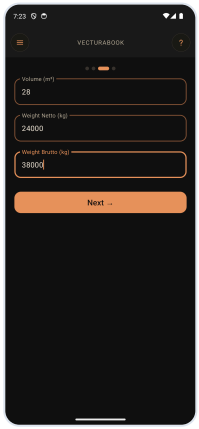

Curtainsider

A curtainsider carries general cargo on pallets.

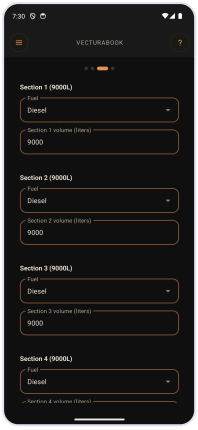

Tipper

A tipper carries bulk cargo.

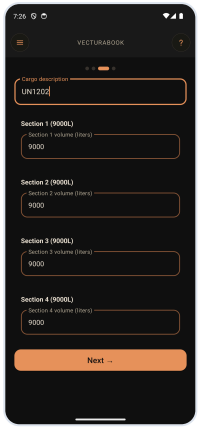

Fuel Tanker

A fuel tanker carries fuel in separate sections.

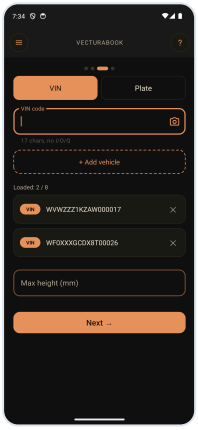

Tanker

A tanker carries liquid cargo.

Car Transporter

A car transporter carries passenger vehicles.

Lowbed

A lowbed (extendable low loader) carries oversized and heavy cargo.
